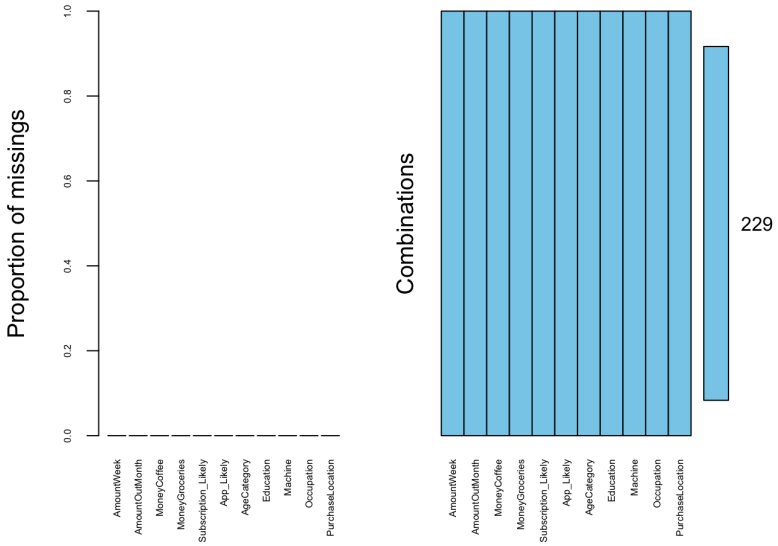
Steps data analysis

- Univariate descriptions - categorical variables
    - Data table
    - Graphs
- Univariate descriptions - numerical variables
    - Summary
    - Confidence intervals
    - Graphs
- Boxplots - numerical
- Joint distribution tables
- Outliers
- Parametric testing
- Relationships & correlations
    - Residual plots
- Regressions
- Data problems

Introduction



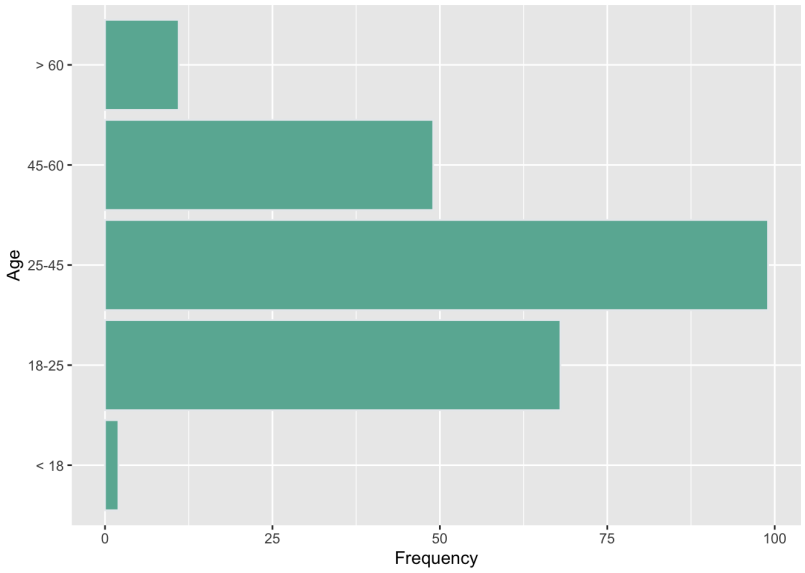
The variables included in the data set are:

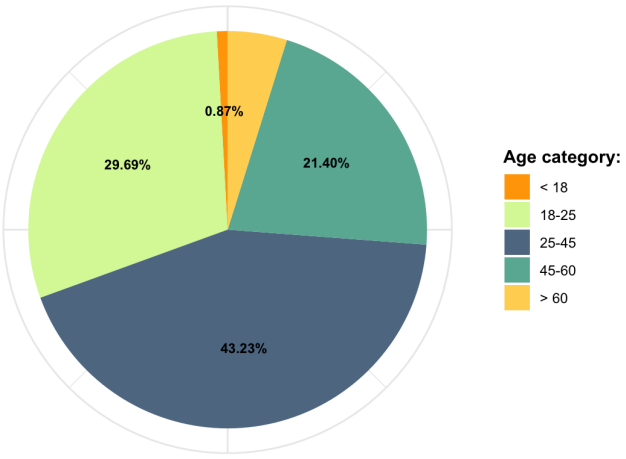
Field	Description
AmountWeek	How many cups of coffee do you typically consume weekly?
AmountOutMonth	How frequently do you drink out-of-home per month on average?
MoneyCoffee	How much money on average do you estimate you spend on coffee per month?
MoneyGroceries	How much on average do you spend on general groceries per month?
Machine	How do you brew your coffee at home?
Brand change	How often do you switch between coffee brands?
Purchase location	Where do you usually purchase your coffee?
Supermarket_Positive_Reasons	When you purchase coffee from the supermarket what are your main reasons for doing so?
Supermarket_Negative_Reasons	What would be reasons why you would not purchase coffee from the supermarket?
Criteria_Type_Coffee	What are your main criteria's or evaluation points for choosing the type of coffee?
KnowledgeCoffee	How would you describe your knowledge level regarding coffee in general?
Purchase_Price	I believe that the ____ is important to my decision on which coffee to purchase.
Purchase_Sustainability	I believe that the ____ is important to my decision on which coffee to purchase.
Purchase_Sustainability	I believe that the ____ is important to my decision on which coffee to purchase.
Purchase_Fairtrade	I believe that the ____ is important to my decision on which coffee to purchase.
Purchase_Packaging	I believe that the ____ is important to my decision on which coffee to purchase.
Frequency_Specialty	How often do you drink specialty coffee?
Subscription_Likely	How likely are you to have an online subscription for (specialty) coffee?
Subscription_Not_Likely	What is the number one reasons why you would be hesitant?
App_Likely	How likely are you to value and use an app for your online subscription?
Gender	What is your gender?
AgeCategory	What is your age category?
Occupation	What is your occupational status?
Education	What level of education have you completed?
Home	How would you describe the place you currently live in?

Univariate descriptions - Categorical variables

Age category

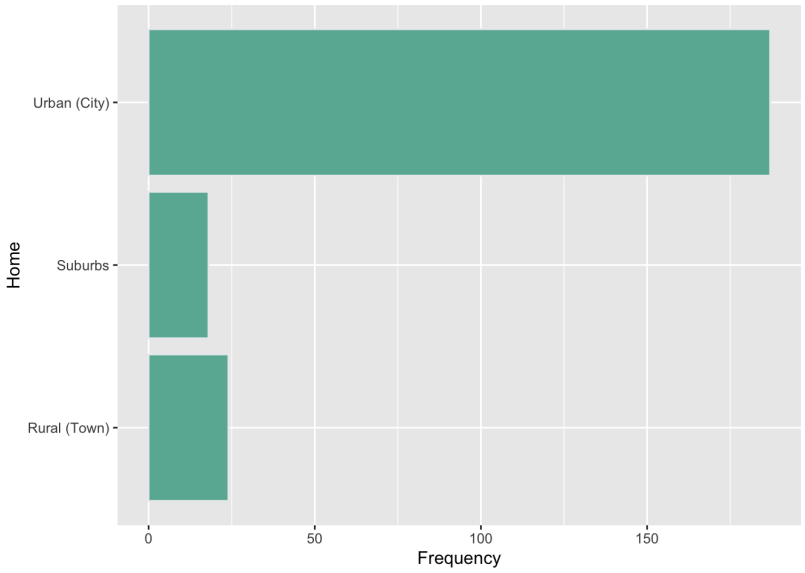
Age Category	Absolute	Relative
< 18	2	0.87%
18-25	68	29.69%
25-45	99	43.23%
45-60	49	21.40%
> 60	11	4.80%

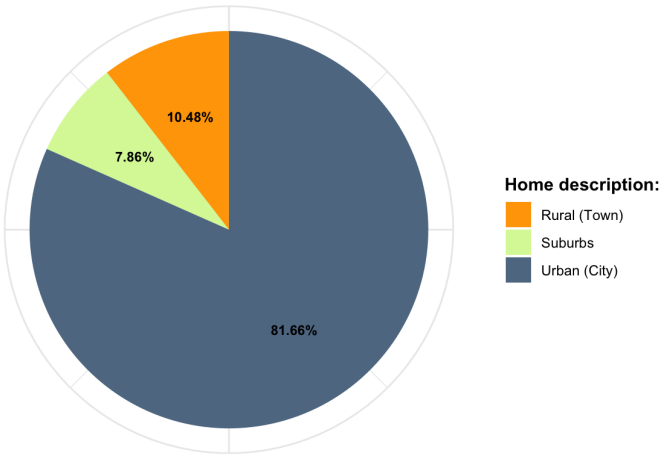




Home

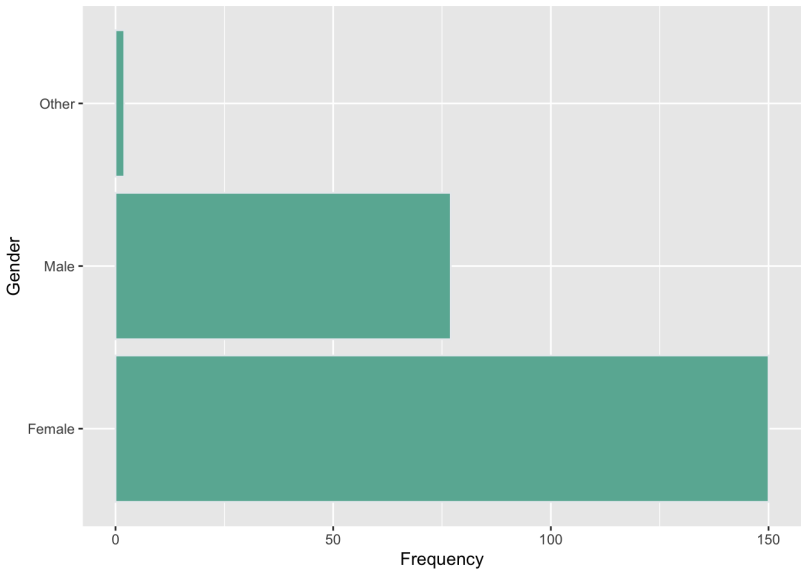
Home	Absolute	Relative
Rural (Town)	24	10.48%
Suburbs	18	7.86%
Urban (City)	187	81.66%

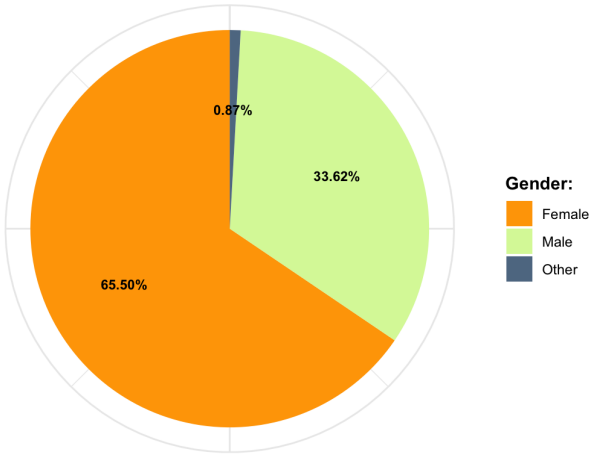




Gender

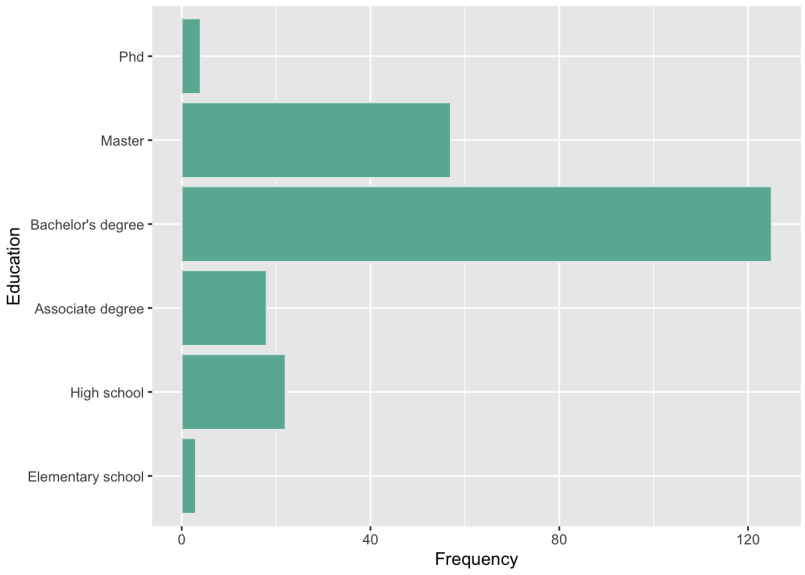
Gender	Absolute	Relative
Female	150	65.50%
Male	77	33.62%
Other	2	0.87%

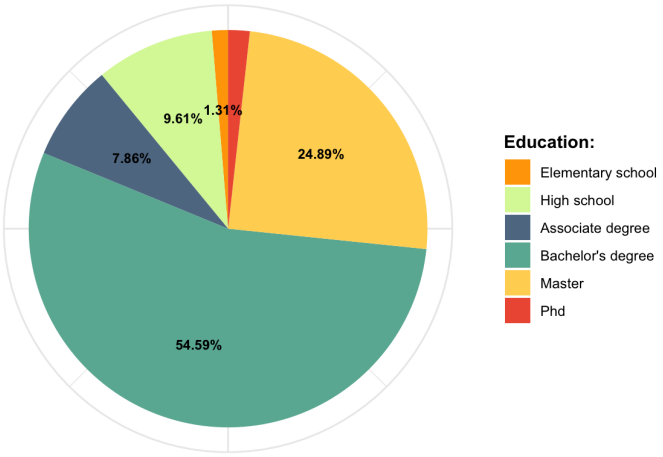




Education

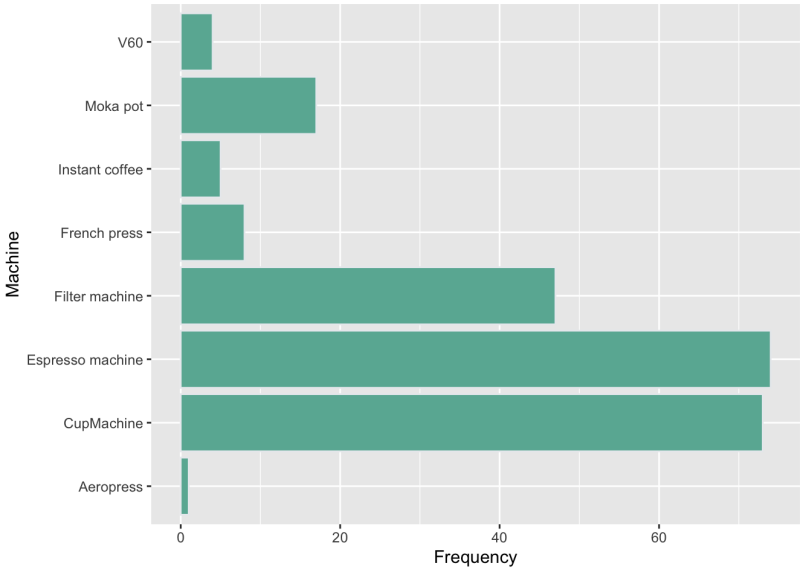
Education	Absolute	Relative
Elementary school	3	1.31%
High school	22	9.61%
Associate degree	18	7.86%
Bachelor’s degree	125	54.59%
Master	57	24.89%
Phd	4	1.75%

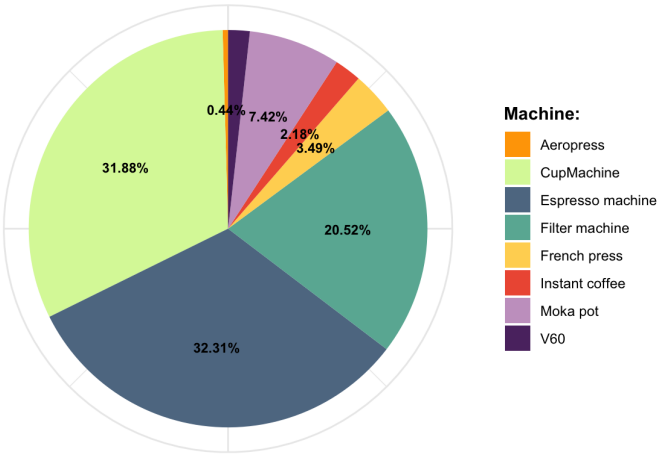




Machine

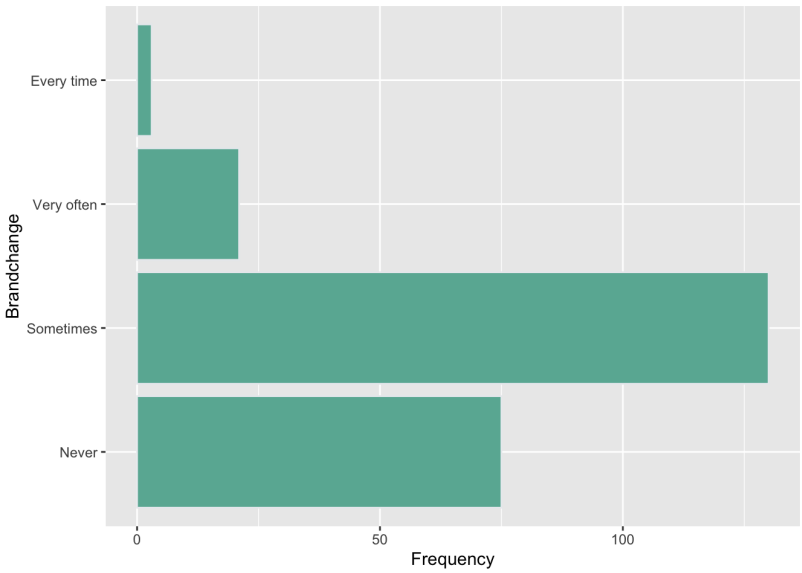
Machine	Absolute	Relative
Aeropress	1	0.44%
CupMachine	73	31.88%
Espresso machine	74	32.31%
Filter machine	47	20.52%
French press	8	3.49%
Instant coffee	5	2.18%
Moka pot	17	7.42%
V60	4	1.75%

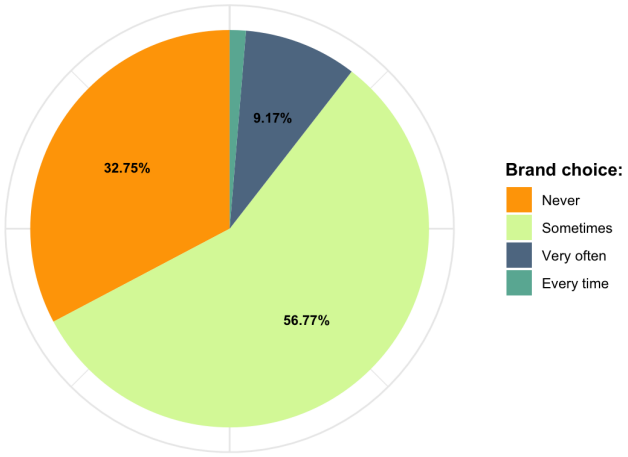




Brand choose

Brand choice	Absolute	Relative
Never	75	32.75%
Sometimes	130	56.77%
Very often	21	9.17%
Every time	3	1.31%





Purchase Method

Purchase Method	Absolute	Relative
E-commerce	38	16.59%
Online subscription	11	4.80%
Specialty stores or cafés	29	12.66%

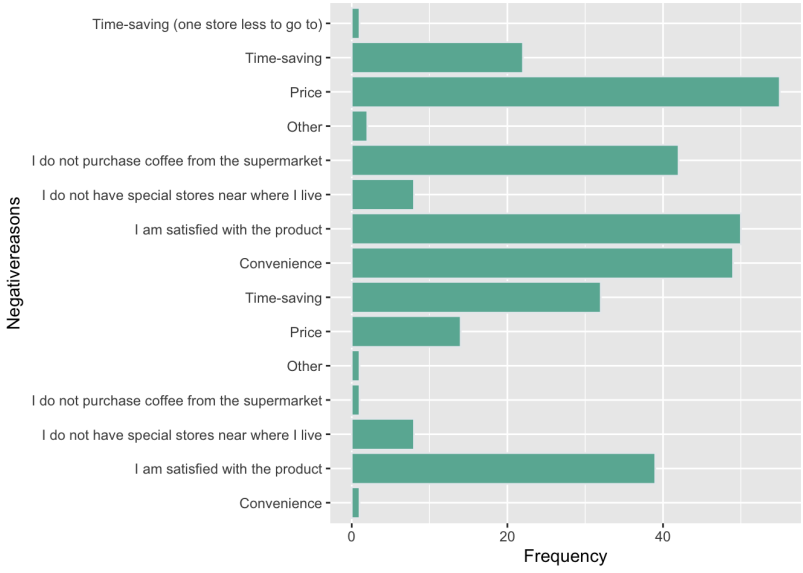
Multiple option answers:

Reasons buying from the supermarket

```
    N
1 325
```

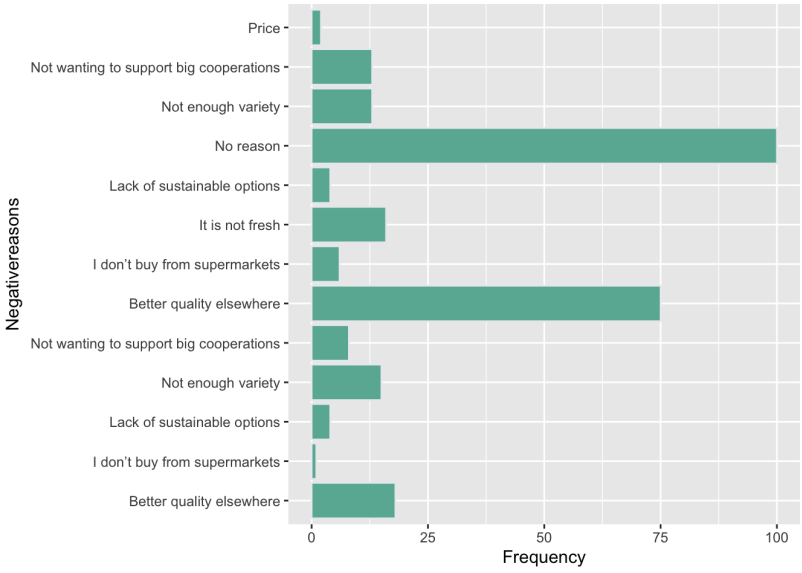
Reason	Frequency
Convenience	1
I am satisfied with the product	39
I do not have special stores near where I live	8
I do not purchase coffee from the supermarket	1
Other	1
Price	14
Time-saving	32
Convenience	49
I am satisfied with the product	50
I do not have special stores near where I live	8
I do not purchase coffee from the supermarket	42
Other	2
Price	55
Time-saving	22
Time-saving (one store less to go to)	1



Reasons for not buying from the supermarket

Reason	Frequency
Better quality elsewhere	18
I don’t buy from supermarkets	1

Lack of sustainable options	4
Not enough variety	15
Not wanting to support big cooperations	8
Better quality elsewhere	75
I don’t buy from supermarkets	6
It is not fresh	16
Lack of sustainable options	4
No reason	100
Not enough variety	13
Not wanting to support big cooperations	13
Price	2



Criteria for choosing the type of coffee

Reason	Frequency
Better quality elsewhere	18
I don’t buy from supermarkets	1
Lack of sustainable options	4
Not enough variety	15
Not wanting to support big cooperations	8
Better quality elsewhere	75
I don’t buy from supermarkets	6
It is not fresh	16

Parametric testing

H_0 <- There is no association between the two variables.
H_a <- There is a association.

Age - Amount coffee drank

```
    Pearson's Chi-squared test

data:  AmountWeek and AgeCategory
X-squared = 236.36, df = 136, p-value = 0.0000002125

    Pearson's Chi-squared test with simulated p-value (based on 500
    replicates)

data:  AmountWeek and AgeCategory
X-squared = 236.36, df = NA, p-value = 0.005988
```

Education - Amount coffee drank

```
    Pearson's Chi-squared test

data:  AmountWeek and Education
X-squared = 225.64, df = 170, p-value = 0.002762

    Pearson's Chi-squared test with simulated p-value (based on 500
    replicates)

data:  AmountWeek and Education
X-squared = 225.64, df = NA, p-value = 0.07385
```

Gender - Amount coffee drank

```
    Pearson's Chi-squared test

data:  AmountWeek and Gender
X-squared = 68.66, df = 68, p-value = 0.4548

    Pearson's Chi-squared test with simulated p-value (based on 500
    replicates)

data:  AmountWeek and Gender
X-squared = 68.66, df = NA, p-value = 0.3473
```

Home - Amount coffee drank

```
    Pearson's Chi-squared test

data:  AmountWeek and Home
X-squared = 65.386, df = 68, p-value = 0.5674

    Pearson's Chi-squared test with simulated p-value (based on 500
    replicates)
```

```
data:  AmountWeek and Home
X-squared = 65.386, df = NA, p-value = 0.6128
```

App - Age

```
    Pearson's Chi-squared test

data:  App_Likely and AgeCategory
X-squared = 56.56, df = 36, p-value = 0.01585

    Pearson's Chi-squared test with simulated p-value (based on 500
    replicates)

data:  App_Likely and AgeCategory
X-squared = 56.56, df = NA, p-value = 0.02395
